IGFD 3

University students in Latvia, teachers, project managers, environmental activists.

Feedback received

Event 1 Participants very highly assessed the moderated discussion by Paula Pucite who is working with students on daily basis, discussing the possibilities to join different EU funded initiatives regarding environmental action

Event 2 The participants enjoyed the stories from different countries, as well as the examples from African continent

Event 3 The participants enjoyed the printed materials from different partner countries as well as the discussion with the steering group participant from Madona country who shared the story about the forest

Feedback received

Event 4 Participants enjoyed real-life examples of how green future philosophy is adopted in different countries presented by Laura. The discussions on the topic were lively. Participants expressed interest to think more about how they take care of the environment.

Event 5 International partners were impressed by the green initiative carried out by Turiba University students. Discussions on the topic of how different countries practice environment-friendly activities were productive and informative. Visit to Agenskalna Market was a great example of how it is possible to involve community in green activities with limited resources.

Summary and conclusions

Networking for local/international students in environment-related topics, awakening their curiosity for cooperation on EU level

Older generations from different background as inspirational role models to younger generations

Good practices serving as great incentives for peers to take an action

Real life examples and field visits motivate people to be more intentional in adopting green future philosophy.
